

Review from Ron Plotsker

Arnie Seltzer of Results Real Estate Incorporated represented me and my company in the purchase of the 3805 Washington Avenue North, Minneapolis, MN (Orbit Building) that closed during the first week of February, 2020 for \$2,275,000. This deal could not have happened without Arnie Seltzer. He works hard, is extremely thorough and very persistent. He does not leave a single stone unturned and during this period I came to understand just how sharp he is with regard to the dynamics of the commercial real estate transaction. In fact he saved me approximately \$40,000 that I would not have known to ask for. Arnie Seltzer and Anna Murray of Results Real Estate Incorporated are a pleasure to work with and I would recommend them to anyone.

"We have housed our headquarters in four different buildings in the past 52 years. When we were considering our office needs we immediately thought of the professionals at Results Real Estate Incorporated because of our experience with Arnie Seltzer over a decade back when he helped us get into our current office. The Results team is an experienced, reliable, trustworthy, competent team with thorough and excellent communication. Arnie, Anna and their team helped us by

providing options quickly and drama-free after an evaluation of our needs. We did not select the first property but did evaluate three of the different properties they presented before all of us knew which one we wanted to negotiate with further. The Results team helped us to be fair and firm about our position and get to the price we wanted and the concessions we needed. They also assisted in a stress free transaction ensuring all parties had completed their work before closing. We purchased a building that is perfect for us and grew our friendship with a true business partner in Results Real Estate. We recommend their service without reservation."
